## INTRODUCTION

The Moratorium Protection Act of 1995 (henceforth Moratorium Protection Act, MPA or Act) is one of the most important authorities the United States government has to stop illegal, unreported, and unregulated (IUU) seafood products from entering U.S. markets but it could be used to achieve far more effective results. This Act establishes a system that allows the U.S. to identify and engage diplomatically with countries whose vessels have been IUU fishing, and to impose sanctions—including restricting market access for imports or other sanctions—on the countries that fail to act to address illegal practices. As the largest single-country seafood market in the world, the U.S. has significant leverage to advance efforts to combat IUU fishing worldwide through the sanctions it imposes.

Under the MPA, the Secretary of Commerce is directed to compile and analyze information from a variety of sources and create a list of nations and fishing entities that have: 1) vessels engaged in IUU fishing during sequential three-year periods; 2) violated a conservation and/or management measure of an international fishery management agreement that the United States is a party to; and 3) failed to effectively address IUU fishing in areas where no international fishery management organization has a mandate to regulate the fishing activity in question.<sup>1</sup> This list is included in a biennial report to Congress (Report). In the 2019 Report, only three countries were identified: Ecuador, Mexico, and South Korea.

However, the U.S. system is hindered by its reliance on a narrow definition of IUU fishing [Box 1] that results in only a limited number of countries being identified and engaged with, although IUU remains a widespread and persistent problem. To date, this system has not resulted in any serious penalties, sanctions, or other consequences for countries that have been identified. **Only twice in the twenty-five plus years since the MPA's enactment has a country been negatively certified,<sup>2</sup> and restrictions on market access have never been imposed.**

NOAA recently released a [proposed rule](#) (87 FR 40763) that expands the definition of IUU fishing to reflect the Food and Agricultural Organization of the United Nations (FAO) global definition, and also proposes the addition of “forced labor” to the scope of activities subject to identification for IUU fishing. These measures, if adopted, are aligned with recommendations contained within this report, and would go a long way to strengthen the U.S. ability to combat IUU fishing when implementing the *Moratorium Protection Act*.

1. 16 USC §1826j(a)

2. Mexico was negatively certified in the 2017 and 2021 Reports to Congress. <https://media.fisheries.noaa.gov/2021-08/2021ReporttoCongressonImprovingInternationalFisheriesManagement.pdf> and [https://media.fisheries.noaa.gov/dam/migration/2017biennialreport\\_508.pdf](https://media.fisheries.noaa.gov/dam/migration/2017biennialreport_508.pdf)

### **Box 1: How does current U.S. regulation define IUU fishing?<sup>3</sup> (NOAA definition)**

The current definition of IUU fishing recognized by U.S. regulation includes the following components:

1. In the case of parties to an international fishery management agreement to which the United States is a party, fishing activities that violate conservation and management measures required under an international fishery management agreement to which the United States is a party, including but not limited to catch limits or quotas, capacity restrictions, bycatch reduction requirements, shark conservation measures, and data reporting;
2. In the case of non-parties to an international fishery management agreement to which the United States is a party, fishing activities that would undermine the conservation of the resources managed under that agreement;
3. Overfishing of fish stocks shared by the United States, for which there are no applicable international conservation or management measures, or in areas with no applicable international fishery management organization or agreement, that has adverse impacts on such stocks; or,
4. Fishing activity that has a significant adverse impact on seamounts, hydrothermal vents, cold water corals and other vulnerable marine ecosystems located beyond any national jurisdiction, for which there are no applicable conservation or management measures or in areas with no applicable international fishery management organization or agreement.
5. Fishing activities by foreign flagged vessels in U.S. waters without authorization of the United States.

An important first step to more effectively combat IUU fishing globally would be to “expand” the U.S. definition of IUU fishing to be more comprehensive, as well as to include fishing that has been conducted by forced labor. These changes would then allow the U.S. to identify more countries whose vessels are actually IUU fishing. Under the Act, the identification of countries falls to the NOAA Fisheries, which prepares a biennial report to Congress that lists the countries engaged in IUU fishing as per the U.S. definition.

WWF conducted research on the impact such changes would have, i.e., which countries would be identified with an “expanded” definition of IUU fishing. The authors evaluated media, government reports, the reported violations from 22 fishery management bodies, and other public databases to identify additional violations. Based on this research, if the U.S. were to expand its definition of IUU fishing and broaden its information collection, an additional 600 reported violations from 70 flag states would have been identified in the 2019 Report to Congress—compared to the three identified in the report.

3. 16 USC §1826j(e)(2) directs the Secretary of Commerce to develop a definition of “illegal, unreported, or unregulated fishing”. Section (e)(3) provides as follows:

(3) GUIDELINES The Secretary shall include in the definition, at a minimum—

(A) fishing activities that violate conservation and management measures required under an international fishery management agreement to which the United States is a party, including catch limits or quotas, capacity restrictions, bycatch reduction requirements, and shark conservation measures;

(B) overfishing of fish stocks shared by the United States, for which there are no applicable international conservation or management measures or in areas with no applicable international fishery management organization or agreement, that has adverse impacts on such stocks; and

(C) fishing activity that has an adverse impact on seamounts, hydrothermal vents, and cold water corals located beyond national jurisdiction, for which there are no applicable conservation or management measures or in areas with no applicable international fishery management organization or agreement

## METHODS

### *Expanding the Definition of IUU Fishing*

As mentioned, NOAA recently released a more expansive definition of IUU fishing through proposed rule (87 FR 40763). This definition reflects the FAO global definition [Box 2]. Therefore, for the purpose of this analysis, the “expanded” definition of IUU fishing is considered to encompass activities covered by the present U.S. regulations [Box 1], and fishing activity that meets the certain components (those in **bold**, Box 2) of the definition of IUU fishing from the FAO IPOA.

#### **Box 2: Is there an internationally-recognized definition of IUU fishing? (FAO IPOA definition)**

The United Nations Food and Agriculture Organization presents a definition of IUU fishing in its International Plan of Action to Prevent, Deter and Eliminate Illegal, Unreported and Unregulated Fishing (IPOA-IUU). The components of that definition are as follows, and those in **bold** are covered by this analysis.

1. National vessels fishing without permission or in violation of their own national laws;
2. **Foreign vessels fishing in national waters other than the waters of the United States without or in violation of national laws; (EEZ issue)**
3. **Violations of international fishery management organization conservation and management measures by its members for international fishery management organizations that the United States is not a member of; (U.S. not a member issue)**
4. Other violations of applicable international law;
5. Violations of generic national laws or international obligations;
6. Failure to report or misreporting in violation of national laws;
7. **Failure to report or misreporting of fishing in areas covered by an international fisheries management organization that the United States is not a member of; (U.S. not a member issue)**
8. Violations of the "reporting procedures" of an international fisheries management organization that are not included in conservation and management measures;
9. **Fishing by vessels without nationality in a manner that is not consistent with or in violation of a conservation and management measure of an international fishery management organization; (Unflagged vessel issue) and;**
10. In areas and for fish stocks where there is no conservation and management measure in place but where fishing occurs in a manner that is "inconsistent with State responsibilities for the conservation of living marine resources under international law."

### *Information Collection Process and Discussion*

All readily available information, including compliance reports from regional fisheries management organizations (RFMOs) and media reports in English were used. Table 1 lists the 22 bodies that were examined for this report, including bodies the United States is not a party to. Additional information provided by NOAA Fisheries in response to a request under the Freedom of Information Act was also used.<sup>4</sup>

Table 1: Regional Fisheries Management Bodies Explored for Violations

<b>Regional Fisheries Management Organization/Body</b>	<b>US Party</b>
Inter-American Tropical Tuna Commission	Yes
Indian Ocean Tuna Commission	No
The General Fisheries Commission for the Mediterranean	No
North East Atlantic Fisheries Commission	No
South Indian Ocean Fisheries Agreement	No
South Pacific Regional Fisheries Management Organization	Yes
North Pacific Anadromous Fish Commission	Yes
Convention on the Conservation and Management of Pollock Resources in the Bering Sea	Yes
Central Asian and Caucasus Regional Fisheries and Aquaculture Commission	No
Lake Tanganyika Authority	No
The Commission for the Conservation of Antarctic Marine Living Resources	Yes
International Commission for the Conservation of Atlantic Tunas	Yes
Commission for the Conservation of Southern Bluefin Tuna	No
Western and Central Pacific Fisheries Commission	Yes
Northwest Atlantic Fisheries Organization	Yes
North Pacific Fisheries Commission	Yes
South East Atlantic Fisheries Organization	No
North Atlantic Salmon Conservation Organization	Yes
Pacific Salmon Commission	Yes
International Pacific Halibut Commission	Yes
Fisheries Committee for the West Central Gulf of Guinea	No
FAO Regional Commission for Fisheries (RECOFI)	No

Then, based on the information gathered, the authors developed a list of nations and fishing entities that would have been preliminarily identified in the 2019 Report to Congress, had the “expanded” IPOA-IUU definition been added to the NOAA IUU fishing definition.

### Findings

Using this methodology, the authors identified a total 612 alleged violations in the 2016-2018-time frame.<sup>5</sup> The full list of applicable alleged violations can be found in Appendix A.

Violations are categorized by three elements: vessel name, flag state, and the target species of the infraction. Of the 600+ alleged violations, a vessel was named in less than 55% of reported sightings of IUU fishing, and less than 80% of the time was a flag identified (Figure 1). Given the nature of IUU vessel sightings at sea, the fact that target species and exact fishing dates are provided in less than 15% of all reports points to the difficulties of proceeding with prosecutions for all but the most heavily documented violators. Assessing and eliminating duplicate reports of illegal vessels is challenging, though some RFMOs note that their illegal vessel lists include cross-listing of vessels identified by others (e.g., South East Atlantic Fisheries Organization, International Commission for the Conservation of Atlantic Tunas).

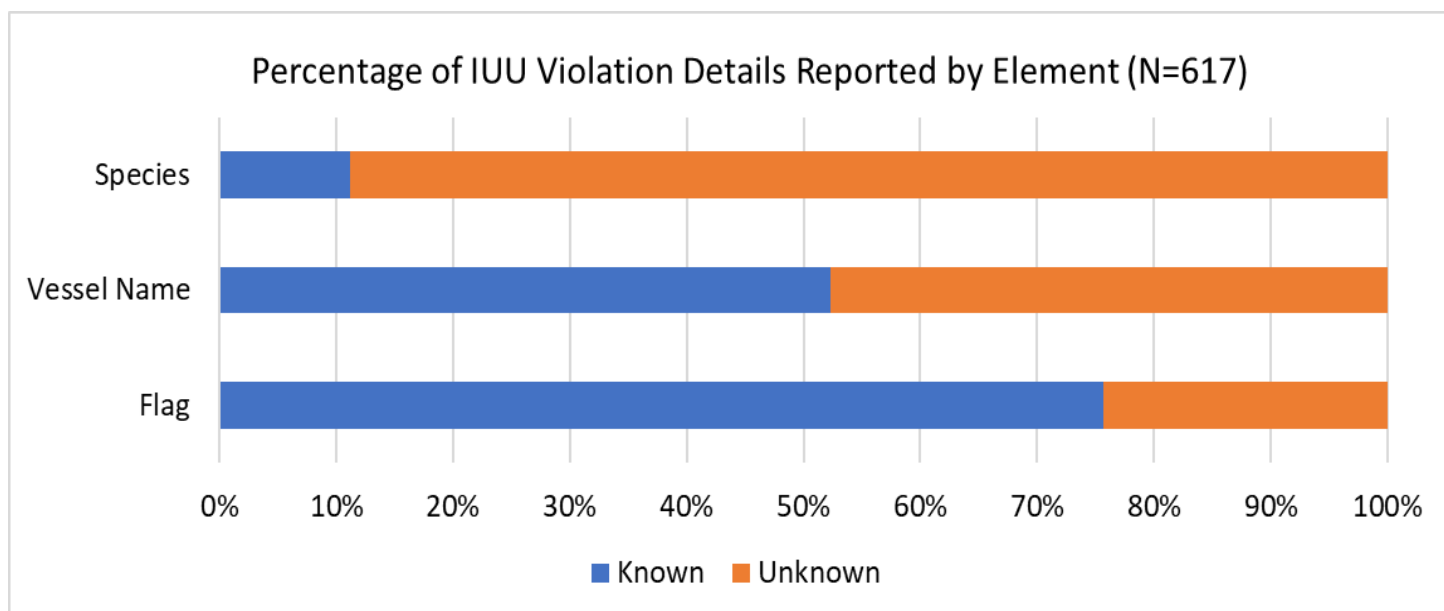

Figure 1: Percentage of IUU Violation Details Reported by Element

4. That request was for all information that NMFS used to prepare the 2019 report including information that was provided in response to a request for information on IUU fishing, protected living marine resources bycatch activities, and shark fishing that was published in the Federal Register on May 22, 2018.

5. The Report does not include analogous information.

## Flag State Violations

Examination of flag states, when they could be identified, reveals that there are many countries that have flag vessels that were accused of multiple offenses ([Table 2](#)) during the period studied. Ecuador, China, the Russian Federation, Venezuela, Panama, St. Vincent and the Grenadines, the United States, the European Union, Nicaragua, and Mexico each have 10 or more alleged occurrences of IUU fishing, and 51 countries<sup>6</sup> have three or more alleged violations. A notable distinction among RFMOs is that in some, European Union (EU) countries are listed individually, while in others they are not. As a result, EU member states France and the United Kingdom each have violations listed, while an additional 11 violations were left unattributed to specific nations under the generic label of “EU”. Although the RFMOs may keep this information non-public, for the purpose of MPA identifications it is likely that the United States would be able to obtain information on the flag state for each violation attributed to the EU. We have not been able to do so for this report.

Table 2: Potential Violations Reported by Vessel Flag from 2016-2018

Ecuador <sup>†</sup>	53	Guyana	8	Japan	6*
China	16*	Sao Tome & Principe	8	Nigeria	6*
Russian Federation	14*	Sierra Leone	8	Portugal	6

Indonesia	1*
Iran, Islamic Republic of	1*
Kiribati	1
New Zealand	1
Norway	1
Somalia	1
Taiwan	1*
Tanzania	1*
Ukraine	1*
Vietnam	1*

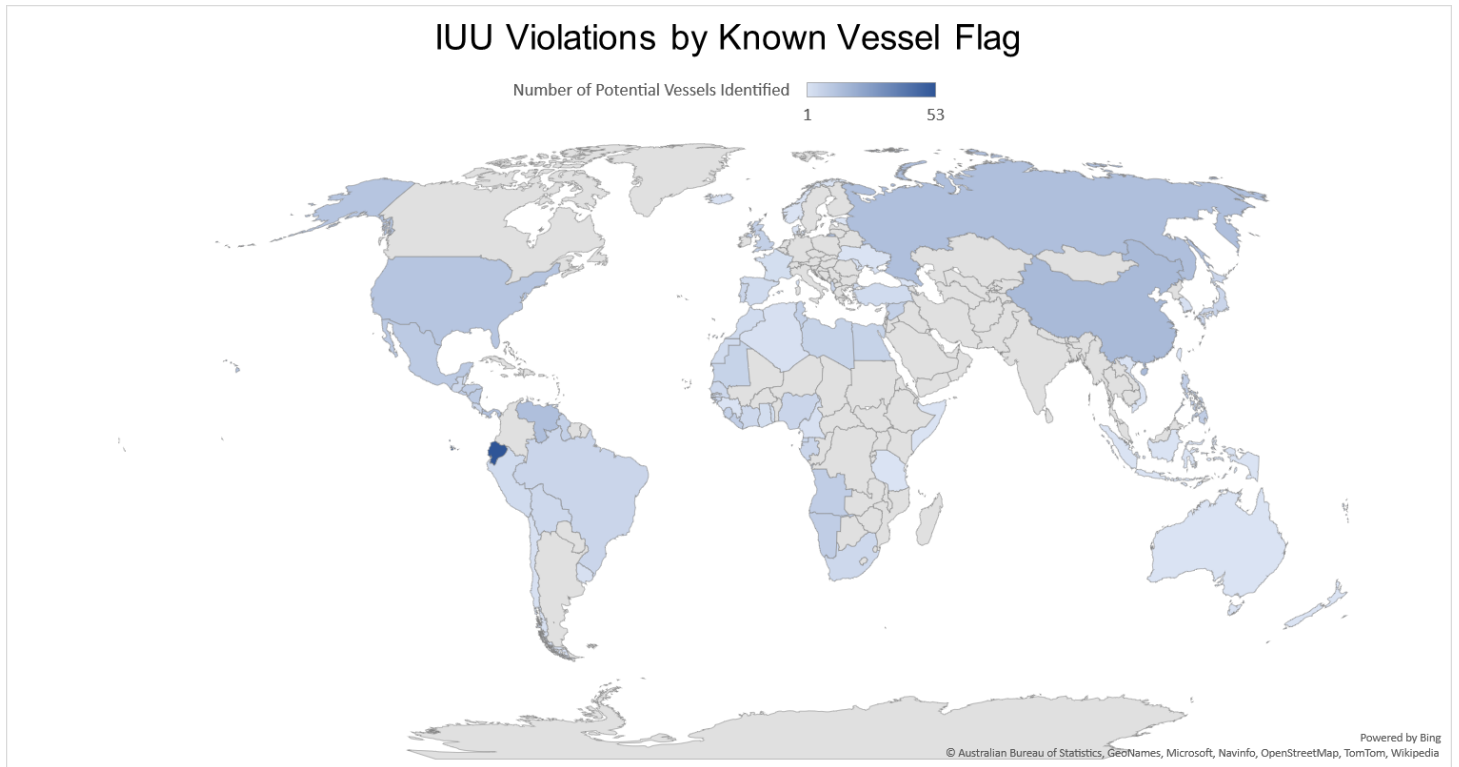

Of the 612 alleged violations identified in this analysis, 150 occurred in waters managed by RFMOs to which the United States is not a party, or in the EEZ of foreign nations. The authors note that actions taken by the flag state are considered by NOAA in the process of reviewing violations for the purpose of identification. The figures presented here do not reflect an application of additional review of this type.

The volume of IUU fishing vessel reports without an identified flag nation should be of significant concern to NOAA in its efforts under the MPA, as the frequency of these sightings alone may represent significant IUU fishing activity. While it is beyond the scope of this paper to cross-reference and conduct additional research to determine the possible origins of these IUU vessels, the fact that we were able to uncover such a large number of unidentifiable IUU fishing vessel reports indicates a serious gap in monitoring and enforcement in federal waters as well as the high seas. While the process of uncovering and cross-referencing these unidentified vessels using additional information such as imagery, models of vessel movements, and confidential reports would be a significant undertaking, it would at least help to identify the total number of spotted but unidentifiable fishing vessels.

† A note about Ecuador: The information collection process for this study relied on alleged violations reported between the period of 2016 to 2018. As mentioned, Ecuador was listed in the 2019 report to Congress, and in the same year also received a 'yellow' card listing from the European Union. Both listings served as warnings that the EU and US would consider banning Ecuadorian seafood imports from entering their markets. These designations prompted Ecuador to improve legislation and practices to curb IUU fishing, and by 2021, the country received a positive certification from the United States.

6. Throughout this document, references to "countries" or "nations" include fishing entities that have been able to undertake obligations under one or more fishery management agreements.

Figure 2: Map of Violations by Vessel Flag

### *The Trygg Matt Combined IUU Vessel List*

Beyond public reports and government to government information sharing sources, an international non-profit, TMT, also compiles IUU fishing report data that is widely used. The TMT Combined IUU Vessel List<sup>7</sup> pulls information from RFMO IUU lists, online vessel databases, national fisheries authorities and other sources. We explored the TMT database for violations that appear to have been posted in the 2016-2018 time frame and found violations from four countries( [Table 3](#)), not reported by our methodology above as well as additional violations in some countries included in Table 2, including China.

Table 3: Combined Research and Trygg Mat Database for 2016-2018 violations

Number of Violations			
10 or more	7 to 9	4 to 6	1 to 3

\* EU, while listed as a distinct entity, is not a flag state

\*\* denotes additional flag states based on integration of the TMT IUU Vessels Database

7. <https://www.iuu-vessels.org/>

With over 70 nations with alleged violations to potentially consider for identification, NOAA may need to adopt new considerations for their level of effort to validate these claims if agency resources are limited. An element of the identification process that NOAA does not appear to include but could be a contributing factor to maximize the impact of Reports is scale of U.S. seafood trade with potentially identifiable countries (Table 4).

Table 4: Countries with 2018 Seafood Exports to the United States and 3 or more IUU Reports In Reverse Order of the Value of Seafood Exports<sup>8</sup>

<b>1. China</b>	<b>15. Morocco</b>	<b>29. Tunisia</b>

9. No identified countries in the 2019 Report were listed in the 2018 TVPRA report for seafood.

## Conclusion and Recommendations

One of the most important ways to more effectively combat IUU fishing globally, is for the U.S. to amend the definition of IUU fishing to reflect the FAO definition, and to include violations of labor and human rights standards. This is supported by the findings of this study, as application of the current regulatory definition failed to identify and address hundreds of violations during the relevant time period.

Here are several recommendations for the United States to improve implementation of the provisions of the Moratorium Protection Act to make it more effective in assuring that fish imported into the United States has been caught and produced fairly and in compliance with law.

1. The United States should continue to encourage RFMOs to publicly disclose information on reported violations. Specifically, the United States should promote complete transparency in RFMO compliance processes, including disclosure of the identity and flag of vessels found to have engaged in IUU fishing.
2. NOAA Fisheries should specify the total number of countries with IUU allegations in its Report to Congress in an effort to show the impact of the process of culling alleged violations into verified reports leading to the identification of nations.
3. NOAA Fisheries should continue to consult with the NOAA Fisheries Office of Law Enforcement and the NOAA Enforcement Section of the General Counsel's Office about relevant information those offices may have, or become aware of, in carrying out the NOAA enforcement program; those offices in turn should consult with the U.S. Department of Justice and through Justice with Interpol, the international criminal police organization, for relevant information.<sup>10</sup>
4. The 1995 FAO Agreement to Promote Compliance with International Conservation and Management Measures by Fishing Vessels on the High Seas<sup>11</sup> includes a requirement that "Each Party shall report promptly to FAO all relevant information regarding any activities of fishing vessels flying its flag that undermine the effectiveness of international conservation and management measures, including the identity of the fishing vessel or vessels involved and measures imposed by the Party in respect of such activities." Building off of this requirement, the United States should request that FAO evaluate and develop a model for key data elements for the reporting of IUU fishing vessels. While a model for key data elements would facilitate enforcement, it is not an enforcement action. Presently, information on reports of alleged IUU vessels is so egregiously incomplete, it begs the question: is any additional analysis worthwhile?

10. Interpol's website is <https://www.interpol.int>

11. <http://www.fao.org/3/X3130M/x3130m.pdf>

5. The United States should urge that in all reporting on vessels, vessels of EU-member states be identified by the flag state rather than simply as “EU”. This step will increase transparency about how individual EU members are managing their fleets.

6. As set forth more fully below in the discussion of labor violations and the Department of Labor List of Goods Produced by Child Labor or Forced Labor produced under the Trafficking Victims Protection Reauthorization Act (TVPRA),<sup>12</sup> the Bureau of International Labor Affairs of the U.S. Department of Labor (ILAB) consults with a broad range of entities in developing its reports about incidents of forced and child labor.

7. NOAA should consider a two-phase identification process, as follows:

- Phase 1: Review of alleged IUU fishing activities as it has done in past reports to Congress.
- Phase 2: Consider the additional FAO factors in its definition of IUU fishing, i.e., expand the information collected to include:
  - A) Vessel violations reported by RFMOs to which the United States is not a party (permitted by statute but not provided for in the present regulation);
  - B) IUU fishing of foreign vessels in domestic waters of countries other than the United States (permitted by statute but not provided for in the present regulation); and
  - C) Failure of a nation to meet its obligations under an RFMO conservation and management measure (likely permitted by present statute only for those RFMOs where the United States is a party).

8. In the Report to Congress, NOAA Fisheries should provide more detail about why particular nations for which activities were noted in the information gathering phase were not identified.

9. The alleged violations in *Appendix A* show that a significant number of the vessels engaged in IUU fishing are considered stateless. Increased transparency, including information about the beneficial ownership of fishing vessels and their support vessels, would facilitate efforts by the United States and others to identify the nationality of vessels found to be engaged in IUU fishing. It will also improve the chance that the United States and other nations will be able to hold the owners of stateless vessels accountable when they engage in IUU fishing. Initiatives such as the expansion of the Global Record of Fishing Vessels, the issuance of International Maritime Organization (IMO) numbers for all fishing vessels above 20 or 25 meters, and full implementation of the Port States Measures Agreement by as many nations as possible will contribute to increased transparency. The United States should continue to promote these efforts. It should also explore ways to utilize its authority under the High Seas Fishery Compliance Act<sup>13</sup> to interdict and prosecute stateless vessels fishing on the high seas without a permit.

12. <https://www.dol.gov/agencies/ilab/about/laws>

13. 16 U.S.C. §§5501, *et seq.*

10. The European Union has adopted a regulation for combating IUU fishing that includes a system for determining whether non-EU countries have adequate measures in place to prevent and deter IUU fishing by their vessels. The United States should increase collaboration with the EU on combating IUU fishing with a goal of, among other things, exchanging information about the capacity of various countries to prevent and deter IUU fishing by their vessels. This information should be considered during the process of vetting fishing nations to determine which should be identified in the biennial annual report. The United States should consider similar arrangements with other countries that are gathering similar information.

# WWF MPA Utilization Report Appendix A: 2016-2018 IUU Fishing Violations Table

	Jurisdiction	Source	Species	Response	Vessel Name	Flag	Violation	Dates

12	CCAMLR	SCIC 18 e-cc-xxxvii-a6.pdf	Macrourid s	As a result of the investigation and subsequent findings, the C2 data was resubmitted and an informal warning was issued to the owner and Master of the Janas. This informal warning was to ensure that positional information is recorded accurately in the C2 data and submitted to the Secretariat. Preliminary Status: Compliant Further action: No further action is required Additional Documentation: Attachment A.	Janas	New Zealand	Committee (SC-CAMLR-XXXVI, paragraph 3.146) the Secretariat has undertaken a review of the implementation of the by-catch move-on rules specified in CM 33-03, paragraph 5 and CM 41-09, paragraph 6. CM 41-09, paragraph 6 provides that if the by-catch of any one species is equal to, or greater than, 1 tonne in any one haul or set, then the fishing vessel shall move to another location at least 5 n miles distant. The fishing vessel shall not return to any point within 5 n miles of the location where the by-catch exceeded 1 tonne for a period of at least five days. On 26/12/2017 fishing in SSRU 881H the Janas caught 1 155.2 kg of Macrourids (species code GRV) on haul number 11; hauling was completed at 1950 UTC. The Janas then commenced setting haul number 14 at 23.48 UTC on 26 December 2017 at a distance of 4.6 n miles from the path followed by the vessel on haul	26-Dec-17

13	CCAMLR	SCIC 18 e-cc- xxxvii-a6.pdf		the study of additional materials, there was no evidence found of dumping or discharging any waste from the Mys Velikan into the sea while fishing south of 60°S. Nevertheless, because it is mentioned in the inspection act that some small residues which fall under the definition of 'offal' were discovered on a screen, the issue of compliance with CM 26-01 (2015) 'General environmental protection during fishing' by Russia was included and considered at the ad-hoc workshop that took place in August 2018 in Kaliningrad (Russian Federation), in order to instruct vessel owners. Preliminary Status: Compliant	Mys Velikan	Russian Federation	CM 26-01: This vessel was inspected by New Zealand on 03 December 2017. CCAMLR-SI/E1480 Report of Inspection, 7.3 Inspector's Statement notes '...Both Port and Starboard scuppers only had 20mm mesh grating evidence of small offal discharge. Spoke to chief mate regarding offense and rectification. Agreement that scuppers will be sealed with smaller mesh before next set of gear...' The Report of Inspection did not note any observation of active discharge or dumping of offal. CM 26-01, paragraph 6 prohibits the dumping or discharging of offal and discards.	3-Dec-17
14	CCAMLR	SCIC 18 e-cc- xxxvii-a6.pdf		obligations (including CM 26-01) via legislative instrument, licence conditions and management arrangements. Licence conditions require vessel operators to comply with CCAMLR Conservation Measures. Penalties can apply for a breach of licence conditions. New Zealand authorities shared the results of an at-sea inspection of an Australian flagged vessel soon after the inspection was conducted. The inspection report noted the presence of one plastic strap from one 25 tonne box of squid bait (although we note this should read 25 kg). The vessel was carrying 2 325 bait boxes. The plastic strap was removed and immediately destroyed. Upon receipt of information from New Zealand, Australia undertook an	Antarctic Discovery	Australia	CM 26-01: This vessel was inspected by New Zealand on 04 December 2017 in Subarea 88.2. The CCAMLR-SI/E1536 Report of Inspection, 7.3 Inspector's Statement notes '...Inspection of bait boxes found only one plastic strap around a box of 25 ton (sic) of squid. Plastic strap will be removed, cut and placed in incinerator...' The results of the inspection were also reported by the observer. Paragraph 1 prohibits the use of plastic packaging bands to secure bait boxes.	4-Dec-17
